EXPERIENCES

AP-HP (Assistance Publique - Hôpitaux de Paris) - Apprenticeship - 2017 to 2019

- **Development of an Java API using HAPI-FHIR** (Fast Healthcare Interoperability Resources)

The purpose of the project was to make available sensitive health data of the patients.

For example, the API delivers the PDF files of medical reports to the patients.

It is used since 2018 inside the Portal Patient, into the module "consult your healthcare documents"

- **Total overhaul of the website cme.aphp.fr**

Software migration from Drupal 7 to Drupal 8, installation of different modules (SEO, theming...)

Design, realization and implementation of an architecture using Docker with Nginx, Varnish, Redis, PHP...

- **Comparative analysis about API-Management software**

Installation, test and analysis of software to find which is best one fulfilling APHP's needs.

Kong (plus Konga) and Gravitee were the API-Management software tested

- **Realization of of a newsletter for Drupal 7**

Creation, configuration and integration of a newsletter for the external communication of the website aphp.fr

Senef Soft Neuilly-sur-Seine - Apprenticeship - 2016 to 2017

- Total overhaul of the ERP Progisap, framework upgrade, graphical and ergonomic improvements

- Comparative analysis of mobile frameworks and development of a solution using React-Native

Things & Co Paris XI - **Internship**- May to August 2016

- Development of a back-office using CodeIgniter

- Development of an hybrid application using Ionic 2

STUDIES

Master "web and mobile engineering" - 2017-2019

IIM (Institut de l'Internet de du Multimédia) - Paris-La Défense

Bachelor degree "Web & mobility software engineering developer" - 2016-2017

ECE-Tech - Paris XV

University Institute of Technology "Communication Services and Networks" - 2014-2016

Paris XII University

< > SKILLS

Front-end :

HTML 5, CSS 3, Bootstrap
